Subject: PFJ for Microsoft

Your Honor,

I'm concerned about the proposed settlement in the U.S. vs. Microsoft case, and I urge you to reject it. Microsoft is a convicted monopolist, yet the proposed final judgment allows them to keep vitually all the illegal profits they've amassed over the years. Furthermore, there's no provision to protect the software (and hardware) industry from Microsoft's strong-arm tactics in the future. The monopoly is allowed to stand with very little punishment. In fact, the proposed final judgment would amount to a government mandate of the monopoly.

Please reject the proposed final judgment for its serious shortcomings.

Sincerely,

Michelle B. Fang
